## **Stop Fountain Wind**

To whom it may concern: Honesty and respect has not been addressed during these studies. During the first public mtg with ConnectGen , when asked why we needed this project, Mr Woltag responded- Our reputation. What? How is that important to our state? During our battle with this project we demanded respectful communication, and yet we were told that we were not smart or intelligent enough to understand this project. I felt the same disrespect from Mr H Woltag toward the CEC staff at the last pubic mtg. How do you trust this?

TN#262718 covered most of our concerns, but we would add elimination of the concrete pads following completion of project. We have been unable to find any pad removal anywhere in the US! When all of these significant impacts are compared to the public convenience and necessity of ConnectGen, Fountain Wind LOSES!!

Thank you for your time and attention and hopefully support in rejecting The Fountain Wind Project.

Honestly and respectfully,  
Beth Messick Lattin
