SUBJECT(s) ARB project review and workshop attendance

COMMENTS:

Ms Stern had called Keith Golden and left a message asking if there were any air quality issues to be discussed at today Procter workshop.

I returned her call and told her that today's and the November 5, 1993 workshops were cancelled. I told her that we had declared the project data adequate in the area of air quality pending comments from the District, which we expected November 5, 1993. I mentioned that we expected some input from ARB in the area of interpollutant trading. She said that they were looking at the issue of interpollutant trading. The ARB modeling section would not finish their investigation of the ramifications of interpollutant trading until November 16, 1993.

I told Stern that the Commission would probably accept the AFC as data adequate November 17, 1993. Given the limited issues raised during data adequacy, the next workshops would probably be for data requests and data responses.
