REPORT OF CONVERSATION

PROJECT TITLE: Procter & Gamble

Telephone

Meeting/Location

NAME Aleta Kennard DATE 4/14/94 TIME 4:0 pm

WITH SMAQMD PHONE 386-6179
area code/number

ADDRESS _____

SUBJECT(s) Interpollutant trading ratios

PDOC release date

COMMENTS:

I called Aleta to ask her about SMAQMD's schedule for the Procter PDOC. Aleta said that the Procter PDOC is complete but it will not be released by the District until the interpollutant trading ratio has been released and commented on. She said the District plans to release the interpollutant trading ratio (developed by the District from the FIP data) 25.Apr.94; workshops and commenting should take place around mid-May. The Procter PDOC would be released after that, towards the end of May. A significant issue that could hold up the release of the PDOC is the availability of offsets. If the interpollutant trading ratio causes Procter to fall short of adequate offsets, the District would consider the filing incomplete and hold the release of the PDOC pending "completeness" (additional offsets).

The ratio being considered by the District is approximately 4.0:1.0 for VOC for NO_x. (Aleta said the unfinished ARB data provides a ratio closer to 8:1.) Aleta has talked to SMUD as of last week regarding the tentative 4:1 ratio and the need to pursue additional offsets. The ratio is still under review at the District so it could change.
