RECD: APR 18 1994

REPORT OF CONVERSATION

Project Title: Procter and Gamble AFC

Phone Conversation With: Doug Timpe Date: April 13, 1994
Time: 1445

At: Black & Vetch, Kansas City, MO Phone: (913) 339-7214

SUBJECTS DISCUSSED:

1. Alternative non-fresh water sources for power plant cooling
2. Steam supply to Procter & Gamble as an element of current industrial water use by Procter & Gamble.

REMARKS:

1. The initially considered Procter & Gamble wastewater for cooling but disregarded this idea when they found out that P&G shuts down for two week each year and would cut off their cooling water.
2. Black & Veatch staff recalculated the mean and maximum steam demanded by the P&G processes which should be subtracted from the Cogeneration Project demand.
