d. UTM: (give more than one for large and/or linear resources) Zone 11; (Start) 639417mE/ 3747913mN
(End) 643047mE/ 3742334mN

e. Other Locational Data: (e.g., parcel #, directions to resource, elevation, etc., as appropriate)

*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

P-BE-008 is the No. 2 Eagle Mountain – KEM Transmission Line. The 33kV line consists of overhead transmission cables carried by single utility pole structures composed of wood. Each pole contains one to three cross-arm beams near the top of each structure. The line measures approximately 4.3 miles north-south and runs between the community of Eagle Mountain and the Eagle Mountain Pumping Plant. Initially built ca. 1950, it served as part the Eagle Mountain infrastructure.

*NRHP Status Code 6Z

*Resource Name or # (Assigned by recorder) P-BE-008

B1. Historic Name: No. 2 Eagle Mountain – KEM Transmission Line

B2. Common Name: No. 2 Eagle Mountain – KEM Transmission Line

B3. Original Use: Transmission Line B4. Present Use: Transmission Line

*B5. Architectural Style: Transmission Line

*B6. Construction History: (Construction date, alteration, and date of alterations) Built ca. 1950

*B7. Moved? ☒ No ☐ Yes ☐ Unknown Date: Original Location:

*B8. Related Features: None

B9. Architect: Unknown b. Builder: Unknown

*B10. Significance: Theme Industrial Development

Area Eagle Mountain

Period of Significance ca. 1950 Property Type Transmission Line

Applicable Criteria N/A

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

In the late 1940s, Kaiser established the Eagle Mountain Mining Company 11 miles from Desert Center. The mine included a company town supporting dozens of employees and their families. The operation of the mine from the late 1940s to early 1980s (when the mine closed) impacted the local community of Desert Center. The transmission line, along with the parallel No. 1 Eagle Mountain – KEM Transmission Line (P-BE-007), was built ca. 1950 and provided utilities in the operation of the Eagle Mountain complex. Eagle Mountain is significant under NRHP Criterion A and CRHR Criterion 1 for the major impact it had on the region during its operation between 1948 and 1982. Although the transmission line is associated with Eagle Mountain, it served a commonplace function and did not specifically contribute to the historical significance of Eagle Mountain. The No. 2 Eagle Mountain – KEM Transmission Line does not appear to qualify for listing under Criterion A of the NRHP or Criterion 1 of the CRHR. It is also not known to be associated with significant persons in the area, and therefore does not appear to qualify under Criterion B of the NRHP or Criterion 2 of the CRHR. As a standard single-pole wooden transmission line, it does not appear to qualify as significant or unique in the distinctive characteristics of a type, period, or method of construction. Therefore, it does not appear to meet Criterion C of the NRHP or Criterion 3 of the CRHR. Under consideration of all criteria, the transmission line does not appear to meet the criteria for listing in the CRHR individually or as a contributor to a potential district.
