SUPPORT for Repowering AES Plant, Redondo Beach

Dear Ms. Kelly,

We are writing to let you know that as citizens of Redondo Beach, we are very concerned about maintaining all resources necessary to support an uninterrupted supply of electrical power in our region and state. This is important for our everyday needs as well as for an efficient and capable emergency back-up system.

If repowering the AES plant in Redondo Beach plant will ensure a stronger possibility of continued service, regular or emergency, my wife and I completely support it.

Removing electric power generating and transmission capabilities because of NIMBY environmentalism is not good public policy.

We hope and trust that if repowering is needed, you will recommend and support, in fact, insist, that it happen.

Thank you very much for your attention!

Tom and Evelyn Polizzi
