Docket Number: 08-AFC-08A

Bakersfield city resident

The air quality in the valley will be substantially impacted by the construction and operations of this plant. As residents of the Central Valley, we have been constantly reminded of the need to "consider the air" by billboards and public service announcements on the radio. With those concerns in mind, why is the Board of Supervisors considering worsening air quality that is only now, after five years of education and effort, beginning to improve a little? This proposal is nonsensical. And to think that tax payer monies are going to help construct it makes me absolutely furious.

My intention is to continue to oppose this ridiculously conceived plant--- one that keeps changing its focus, by the way. I am urging others to do the same.

Sincerely
