Redondo Beach Power Plant

Dirty power is no longer an option. California knows this, and we in Redondo Beach can easily work with AES to plan an alternative investment that will benefit them and all the people of Redondo Beach.

AES has asked their employees to write you in support of a new plant, but California Energy Commission must consider the larger picture of environmental quality, the benefits of a future green belt as part of a new redevelopment plan, the better economic benefits of enhancing our harbor area with more recreational/tourism opportunities, and development of rooftop solar energy all over our city for a clean, healthy, sustainable substitute for this plant. AES will benefit, though they might not know it, yet. They just need to be able to "think outside the box", this time.

We know it can be done, and we trust you to help make Redondo healthy and beautiful by assisting us on the path to greatness.

Thank You,

Barbara and Jack Epstein and Family
