The Power Plant is a Terrible Idea

The current and especially the proposed power plant is not only unnecessary for our energy needs, but it serves only for

short-term gain at the expense of the health of our residents and the potential beauty of the waterfront. We do not need it or want it.

Imagine the money going into solar energy instead! We personally have solar panels on our home and are generating more

than we use in peak summer months.

Regards,

Susan Stolovy
