NO to AES Power Plant

Dear Ms. Kelly,

I am happy and fortunate to have lived in Redondo Beach for over 15 years despite the blighting effect of the dinosaur AES power generator. So when the opportunity arose for our community to rid ourselves of the unnecessary power plant, my family and friends jumped at the chance and have been committed to shut it down permanently.

No doubt you have read and are familiar with the negative repercussions of installing a new power plant to a city that does not rely on it's limited generation of power therefore I will confine my statement to only pleading with you to prevent providing a permit to AES because we don't want or need it.

It has been difficult for me and my friends to counteract the misinformation and fear put out by AES if a new generator were not built because we do not have the money or power to influence like AES. However, we hope that you will actively listen to the regular individuals like me that make up the city of Redondo when we implore you to help us stop them from building a new one.

Thank you for your time!

Carmen Contreras
