## **Support for HECA**

Dear CEC,

I am writing in support for the Hydrogen Energy California project. I think it is absolutely ridiculous that HECA is being drug through the mud by opponents to this project. HECA has spent millions of dollars on study after study to know sure that they will not be negatively impacting this community and it is still not good enough for these nay sayers. All the people who work for the air pollution control district, County of Kern, State of California up to now are all wrong! That is what they want you to believe, I hope you don't buy it. I ask that you all allow this project to continue on their path to success and approve a permit for the project. Don't let these wack jobs who oppose the project fool you with their wise antics.

I and a whole bunch of other citizens of Kern County support this project. Please permit HECA and do not let a few destroy all of HECA's hard work, plus what the County, State and Federal Government too have been working on.

Bea
