Retire the power plant

Please do NOT allow AES to build another power plant. The one that has been there for the past 50 years is barely functioning and it would be such a waste of money and resources and money in the company's pockets that will not only be inefficient for the public, but it will continue to create horrible air pollution and noise nuisances. There have been numerous times that my family and small children have been awakened in the middle of the night by the steam release of that present plant and it scares the living dailights out of a grown person, much less a small child. Please, please DO NOT approve a new plant to be built. We don't need it. We need renewable solar and wind power that is sustainable and more environmentally friendly. This is your chance to make a difference.
