Support AES

I feel its best for Redondo Beach and South Bay to have a new power plant. Traffic would not increase and a better land use could be had working with AES. AES new plant will be a smaller foot print. AES has been a good neighbor, Sea Lab and White Sea Bass projects are just a few examples. Not in my back yard makes no sense when there is a utility that is needed in California. A modern plant that would be quiet, efficient and able to start up quickly makes a lot of sense if we have a dire need for electricity, like in a earthquake.
