Opinion on creation of a new power plant.

The construction of a new power plant by AES in Redondo Beach on the present site will decrease the particulate emissions into the air. This will be much less than the particulate emissions created by the automobiles in the area. The smaller area that will be used by the new power plant will reduce its footprint and give additional area for renewing and revitalizing the water front in Redondo Beach,

The noise data will be analyzed from the data acquired with instruments will be included in the CEC report. The CEC will make sure that the noise levels will meet the standards for Redondo and Hermosa Beach.

This monitoring process will be on going.

The South Coast Air Quality District proposal to assess annual fees on new power plants for use of emissions exemptions could be mitigation to the community of Redondo Beach in the amount of \$50 million dollars.

The people of Redondo Beach voted no to Prop A on the ballot which stated that they did not want to Phase out the existing power plant ,
