Highest Public Use is Commercial Retail Residential Development

I would like to state that the highest and best use of the property occupied by the AES power plant is for commercial, retail, and residential development - not a power plant. The AES plant was originally built to power a light rail trolley system almost 100 years ago, but it is not required for that purpose, nor is a cost effective and environmentally appropriate source of electricity to the regional grid. Please do not approve an expansion or the continued operation of the plant. Thank you.
