Quail Brush Power Plant AFC (11-AFC-03) - Deny suspension

Dear Commissioners:

I am a intervenor opposed to an additional year suspension for the Quail Brush Generation Project 11-AFC-03 in the East Elliott Planning Area. I also ran for County Supervisor in 2008,12 and will again in 16'.

Deny this suspension. Furthermore, I respectfully request that the application be vacated.

The City Of Santee has set Ca route-52 as a "Historic Scenic Route" and the proposed Power plant would now be a blight on that road!!!! This alone should be a reason to deny the power plant.

A fossil fuel power plant is completely inappropriate for the ecologically sensitive area adjacent to Mission Trails Regional Park and surrounding communities with nearby schools, hospitals, and homes. The project is inconsistent with the City of San Diego LORS. It was denied by the City of San Diego Planning Commission, the San Diego City Council, and the City of Santee. There is massive bipartisan public opposition to Quail Brush.

The proposed project is also located within the East Elliott Multi Habitat Planning Area, part of San Diego's Multi Species Conservation Program (MSCP) open space area. The Mission Trails Regional Park Task Force opposes the siting of the power plant.

The taxpayers of San Diego County object to any further spending of California taxpayer dollars in pursuit of a project that violates so many key local land use provisions.

The cumulative air quality impact to low-lying Santee is not acceptable, no matter what mitigation the power plant offers. The high fire hazard of a gas plant here is too high a price to pay.

The Project failed in providing "alternatives" in/on Other cites. Plus the Project is old 1950's technology and our progressive Green future requires solar or self sufficient power source not Natural Gas!!!!

Please end the 11-AFC-03 process and focus on truly progressive projects-- such as energy storage and rooftop solar--in appropriate places, to generate energy.
