## **HECA plant proposed for kern county**

It is absurd to consider a hydrogen plant in Kern County burning coal shipped in from out of state when Kern county has the worst air quality in the nation. I agree that we need jobs, but we need jobs that improve our quality of life, not reduce it. I don't understand how the project has gotten this far. We are one of the few states in the US to even care about pollution issues. Let's act like it instead of being bought off by the oil industry.
