Docket Number:	07-AFC-06C
Project Title:	Carlsbad Energy Center - Compliance
TN #:	202914
Document Title:	Project Owner's Slides from 8/7/2014 California Energy Commission Committee Conference
Description:	Slide Presentations
Filer:	Dee Hutchinson
Organization:	Locke Lord LLP / NRG
Submitter Role:	Applicant Representative
Submission Date:	8/13/2014 11:06:56 AM
Docketed Date:	8/13/2014

Carlsbad Energy Center Project

Committee Conference and Environmental Scoping Meeting

John Chillemi

President, West Region

George Piantka Director, Environmental

NRG Investment In California

8,344 MW

Natural gas: Fast Ramping & flexible

1,119 MW

Solar: Utility scale and distributed

eVgo: \$100mm infrastructure: 'Fast' & 'level-2' charging stations

PLUS:

District heating & cooling: San Francisco & San Diego

Station A: Innovative energy technology

Encina Power Station/CECP Background

- Encina has served San Diego County since 1950s:
 - o 965 MWs includes steam boiler Units 1-5 and black start CT
 - Located on 95 acres and adjoined by ~300 acre Aqua
 Hedionda Lagoon (AHL) that is also owned by NRG
 - Encina has been integral to local reliability, responding to loss of SONGS, regional blackouts and county fires
 - Host to Poseidon's future 50 MGD Carlsbad Desalination facility and City Lift Station
- Replacement of Encina initiated with 2007 Application for Certification (AFC)
- CA Energy Commission approved the Carlsbad Energy Center Project (CECP) in May of 2012

- CECP PTA offers significant additional environmental benefits as compared to the licensed project:
 - Lower Visual Profile
 - Improved Air Quality
 - Reduced Water Usage
 - Improved Noise Profile
 - Improved Safety
- CECP PTA adds the retirement and removal of Encina, responsive to a key wish of the community
- CECP PTA will continue to be compatible with I-5 widening, City lift station project and Carlsbad Desalination project
- CECP PTA facilitates the future redevelopment of western portions of Encina into non-power generating uses

CECP 2007 AFC Rendition

CECP PTA – Significant Visual Improvement

Petition to Amend Drivers

- Retirement of SONGS in June 2013
- Scheduled retirement or modification of Once Thru Cooling (OTC) at Encina by December 31, 2017
- CPUC authorized 800 MWs in response to Encina's OTC compliance and loss of SONGS
- An amended CECP to include fast start/ramping generation is integral to the long term loss of SONGS and continued growth of renewables in the State

CECP Petition to Remove

- Filed Petition to Remove on April 29, 2014
 - Proposed removal of out-of-service Tanks 1,
 2 and 4 (in addition to Tanks 5—7) on a separate and expedited schedule
 - Adding removal of these tanks to the existing project is a beneficial change that is allowable under CA Law and CEC regulation as a separate, minor change to CECP
 - Expedited removal of these tanks meets mutual goals of NRG & City, realizing immediate visual benefits and improved laydown.

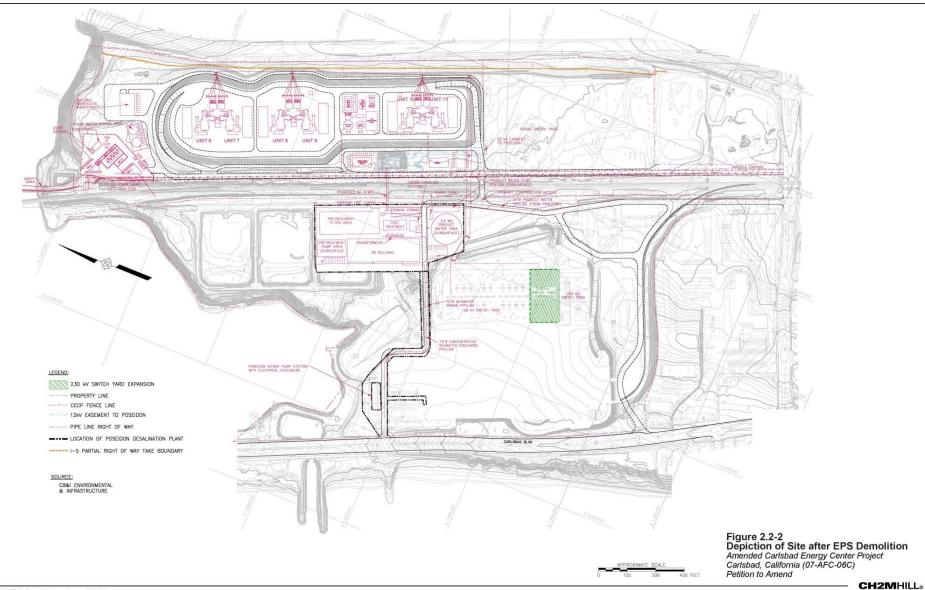

CECP Petition to Amend

- Filed Petition to Amend on May 2, 2014
 - Change type of generation facility from combined cycle to simple cycle peaking
 - Incorporate above ground demolition of Encina
- Filed Authority to Construct/Permit to Operate application with San Diego APCD on May 16, 2014
- CECP PTA demonstrates the necessity of change – significant environmental benefits and generation aligned with SDG&E's needs

Site Layout: CECP PTA

- NRG supports CEC Discovery Phase Prepare Responses to Data Requests (2Q-3Q2014)
- SDAPCD completes Preliminary Determination of Compliance (3Q2014)
- CEC completes Preliminary Staff Assessment (Q42014)
- SDAPCD completes Final Determination of Compliance and CEC completes Final Staff Assessment (Q12015)
- Evidentiary Hearings (Q22015)
- Proposed Decision (Q2-Q32015)
