Subject: Palen Solar Project - Public Comment

I am not opposed to renewables, and encourage the expansion of programs to provide more public/private sector investment in solar and wind. In my opinion more roof top solar and less destruction of what is left of the natural habitats should be a priority.

That being said, I strongly oppose the final approval of this project until the means to protect avian species from harm are firmly established.

Please register my opposition to final approval until as such time the proven successful means to protect bird species from in flight incineration by solar collector plants is established and in place.

Thank you in advance for your cooperation in this matter.

Daniel Nichols
