requests for Public beautification , sound and light mitigation

I live across from the plant and do support the upgrades and changes as I understand them so far.

My request are in sound, and light mitigation for the plant as part of the overall upgrades.

1. Please consider a tall wall inside the current fence with planting on the outside.
2. please consider a sidewalk between the street and fence
3. Please keep as many existing trees as possible, and add some where you can for light and sound mitigation. As well as esthetics.
4. Any reduction in fence height or elimination of trees should be avoided.
