### **Purpose**

California Energy Commission staff will hold a public workshop to present its Preliminary Staff Assessment that was published on July 28, 2014. The workshop will provide an opportunity for the applicant, intervenors, agencies, and the public to make comments and work with staff to resolve issues related to the Redondo Beach Energy Project. Based upon information the staff receives at the workshop and written comments provided by the close of the 30-day comment period that ends on June 4, 2015, the staff will prepare and publish its Final Staff Assessment (FSA). The FSA will serve as staff's testimony at future evidentiary hearings that will be noticed and conducted by the Committee of two Commissioners assigned to oversee this proceeding.

## **Summary of the Proposed Redondo Beach Energy Project**

The RBEP is proposed to replace the existing Redondo Beach Generating Station on a 51-acre parcel, located at 1100 North Harbor Drive in the City of Redondo Beach. The proposed RBEP would be a 496-megawatt (MW) natural gas-fired, combined-cycle, air-cooled, electrical generating facility.
