Saving the trees of California

To Whom It May Concern, I represent a company in Santa Rosa that produces a remarkable product known as DriWater. This product could be used to arrest the loss to drought of millions of trees statewide. Please visit our website, DriWater.com for a full description of the product'

In addition, I have a number of ideas to share, such as a way to prevent evaporation of fresh water from reservoirs. How to desalinate sea water using cheap solar energy, and several ideas for conservation of water at the homeowner level.

Please contact me at 415-513-6948 so I can share these ideas.

Thank you,

Larry Odhner
