Background

As required by Senate Bill 1389 (Bowen, Chapter 568, Statutes of 2002), the Energy Commission conducts "assessments and forecasts of all aspects of energy industry supply, production, transportation, delivery and distribution, demand and prices" (Public Resources Code §25302(a)). The Energy Commission uses these assessments and forecasts to provide an analytical foundation for developing energy policies that conserve resources, protect the environment, ensure energy reliability, enhance the state's economy, and protect public health and safety. Developing energy policy recommendations on the most

current and pressing energy issues facing the state, and across different markets and systems, requires an evaluation of potential trade-offs that explicitly address inter-fuel and inter-market effects (Public Resources Code §25302(b)).

On February 26, 2015 and March 19, 2015, the Energy Commission held workshops to present key assumptions and inputs for the 2015 transportation energy demand forecasts. These workshops provided an overview of the transportation energy demand forecasting process including:

- California's economic and demographic trends
- Overview of the proposed analytic approach
- Transportation fuel demand assumptions
- Crude oil price forecast
- The make-up of California's current vehicle fleet

Agenda

At the June 24, 2015 workshop, staff will present, discuss, and solicit public comments on the preliminary transportation energy demand forecasts for three scenarios common to the electricity and natural gas forecasts developed by other Energy Commission staff. Topics will include:

- Revised crude oil, petroleum-based, and alternative fuel price forecasts
- Preliminary forecasts of light-, medium-, and heavy-duty vehicle attributes
- Preliminary forecasts of California's future vehicle fleet
- Preliminary forecasts of transportation energy demand, including petroleum, alternative, and renewable fuels

Following this workshop, staff will consider stakeholder comments along with direction from the *IEPR* Lead Commissioner and the Transportation Lead Commissioner in developing a set of revised forecasts to be used in a variety of energy policy and planning activities, notably the *2015 IEPR*.

Public Comment

Oral Comments: Staff will accept oral comments during the workshop. Public comments may be limited to three minutes per speaker. Any comments will become part of the public record in this proceeding.

Written Comments: Written comments should be submitted to the Dockets Unit by 4:00pm on **July 8, 2015**. All written comments will become part of the public record of this proceeding.

For the 2015 IEPR, the Energy Commission is using a new electronic commenting system. Visit the website at http://www.energy.ca.gov/2015_energypolicy/ and click on the **“Submit e-Comment”** link in the “Proceeding Information” box. From the drop down menu, please select the appropriate docket number, 15-IEPR-10: Transportation.

This will take you to the page for adding comments to that docket. Please enter your contact information and comment title. Under “subject(s),” select the appropriate IEPR workshop date and “IEPR public comments.” You may include comments in the box titled “comment text” or attach a file with your comments. Attached comments must be in a Microsoft® Word (.doc, .docx) or Adobe® Acrobat® (.pdf) formatted file.

The Energy Commission encourages use of its new electronic commenting system, but written comments may also be by e-mailing them to the Dockets Office, or by U.S. Mail to:
