Redondo Beach Energy Project additional comment

I recently attended one of the workshops the Commission recently held in Torrance. Did I sure I hear correctly that the Commission will NOT take into consideration the information that there is NO need for that amount of generating capacity in the western part of Los Angeles County? During the hearing process we also heard anecdotal evidence that 40 years ago SCE determined that the site was not optimal for any upgrades or refitting.

Last year I was pleased to see that the Commission recognized the need for more battery storage in our grid. Any decision by the Commission to approve a new plant on this site will be inconsistent with the needs of the citizens of California for an optimal grid that can respond to the realities of tomorrow's energy needs. We do not need more generating capacity, we need an upgraded grid.
