Subject: Regarding petition issues update via the Blueprint

Mr. Splitt,

In addition to the email that staff from the Building Standards Office has sent, I have an update for you regarding the status of several issues you identified within the 15-MISC-01 and 15-MISC-02 dockets. As indicated in the Staff Analysis responding to the petition for an emergency rulemaking located here: [http://www.energy.ca.gov/business\\_meetings/2015\\_packets/2015-02-25/Item\\_05b\\_15-MISC-01\\_Staff\\_recommendation\\_on\\_petition.pdf](http://www.energy.ca.gov/business_meetings/2015_packets/2015-02-25/Item_05b_15-MISC-01_Staff_recommendation_on_petition.pdf)  
Issues by number in the petition:

- Issue #5 (phrase meaning “include tradeoffs between two or more altered components”)
- Issue #10 (sentence “all components proposed for alteration must be verified”)
- Issue #12 (installing storage water heaters)

Energy Commission staff are working on Q&A’s, which will provide greater explanation and clarification regarding alterations and the performance approach, field verification for alterations, and the water heater insulation requirements. These will be released in the May/June Blueprint by the end of this month. The Blueprint is delivered via our Listserv.  
Please let me know if you have any questions.
