**NOTICE OF RECEIPT  
PETITION FOR PROJECT MODIFICATION  
HUMBOLDT BAY GENERATING STATION (06-AFC-7C)**

On June 11, 2015, California Energy Commission (Energy Commission) staff docketed the Pacific Gas and Electric Company's (PG&E) petition requesting to make minor improvements to the Humboldt Bay Generating Station (HBGS). The 163-megawatt facility was certified by the Energy Commission in its Decision on September 24, 2008, and began commercial operation on October 1, 2012. The facility is located in the City of Eureka, in Humboldt County, California.

**DESCRIPTION OF PROPOSED MODIFICATION**

PG&E is proposing to store a spare 60-kV, 75 MVA transformer on-site. The spare transformer would be installed on an existing 17 foot x 22 foot foundation. The existing foundation would be expanded to 27 foot x 27 foot to accommodate the transformer. The maximum depth of excavation would be 40 inches. A containment berm would be incorporated into the foundation. Foundation construction is proposed to occur in August 2015, and the spare transformer would be installed in December 2015.
