*Docket Number: 15-WATER-01*

## **Drought Response**

Some questions related to the WET program webinars and materials:

- 1) We wanted to confirm that dairy production sites fall into this Agricultural sector
- 2) What happens if we request more than \$300,000 for the Group B funding? Would some of the projects then be capped at the Group A limits?
- 3) If a proposal for a Group B funding is not granted, will it automatically be considered for Group A (in the case that Group B funding is exhausted)
- 4) Is there a project TRC that the WET Program proposal reviewers need to achieve in order to award a grant?
- 5) What is the correct application timeline: the power point presentation document from the webinars or the program proposal manual?
- 6) What documentation is required to prove a customer is disadvantaged, or is it adequate to simply provide confirmation the project site address appears in the SB535 Disadvantaged Communities mapping tool

Thank you
