Docket Number: 15-WATER-01

Inquiry about the Application for Water Energy Technology (WET) Program

Dr. Tang:

Thank you for your inquiry. There is no eligibility requirement that a company be California-based in order to participate. For an out-of-state company like yours, the only requirement would be to register your company with the California Secretary of State's Office post-award prior to entering into an agreement with the California Energy Commission. For your information, I am providing you with a link to our most recent staff draft guidelines on the water rebate program. <http://www.energy.ca.gov/wet/documents/index.html>. This guide is still in the process of being finalized and if hadn't already done so, please enroll in the Water List Server to receive automatic updates on the status of this, and other items related to the program.

Best Regards;

Donald B. Kazama, P.E., CEM

Subject: Inquiry about the Application for Water Energy Technology (WET) Program

To Whom It May Concern:

My name is Li Tang, and I am the business representative of BDP EnviroTech, a Baltimore based wastewater treatment technology company. We am very excited to hear about this great grant opportunity in WET program and interested in applying for it. We know that there is a public meeting for the inputs in WET program on May 29, but we just have two simple questions to confirm the eligibility for us to apply that grant.

- 1) We are a currently Baltimore based company, are we eligible for this grant application in CA?
- 2) We are curious to get inputs and guidelines about the application documents in order to better prepare the application, can we ask these questions via remote computer access during the May 29 meeting? Or we should better attend in person?

Thanks, and we are looking forward to your reply.

Best,

Li
