RBEP - CEC to perform a needs analysis

I am asking the CEC to perform a needs analysis in regard to AES' application for the Redondo Beach Energy Project. The California Coastal Commission has also recommended this. The residents of Redondo Beach and Hermosa Beach hope to rid our community of the existing power generating plant and not have a new plant take its place. Thousands of people, including myself and my wife, live literally feet from the power plant. We hope you deny AES their permit for construction. A needs analysis will bear the fact that the power is not needed for grid reliability and not required in this area. If the CEC does deny AES their permit to construct, the community hopes to work together with AES to find them viable land use, ceasing industrial land use in this coastal zone. The residents of Redondo and Hermosa have suffered the constant denigration of our quality of life for 100 years because of the power generation facilities operating on this site. We insist that the California Energy Commission perform due diligence in their consideration of the RBEP.

Thank you,

Paul Moses
