Mr. Robert Oglesby
Executive Director
California Energy Commission
1516 9th Street, MS-4
Docket No.: 15-IEPR-02
Sacramento, CA 95814-5512

Dear Mr. Oglesby:

The accompanying compact discs contain Pacific Gas and Electric Company's ("PG&E") revised response to the California Energy Commission's ("Energy Commission") December 2014 request as detailed in the *Final Staff Report: Forms and Instructions for Submitting Demand Forecasts* (CEC-200-2014-006-SF). To correct an error in confidentiality designation in PG&E's previous submittal on June 11, 2015, we are providing a revised Demand Forecast Form 8.1a and accompanying revised request for confidentiality.

The actual data on the form remain unchanged from PG&E's June 11 submittal; only the period for confidentiality has been changed for one item (i.e., the **Other Resources / Expenses**, line 33). Similar to our previous submittal, PG&E seeks confidential designation for a subset of the data in Form 8.1a, as specified in the enclosed documents. For ease of review, two electronic sets of this Demand Forecast form are provided – one confidential version and one with the confidential cells redacted.

PG&E has enjoyed the collaboration with your team on these IEPR issues.

Sincerely,

A handwritten signature in black ink, appearing to read 'Valerie J. Winn', is written over the word 'Sincerely,'. The signature is stylized and fluid.

Valerie J. Winn
