## **ACM 2.4.10 Whole House Fans**

Regarding the ACM, the current language proposed for 2016 regarding whole house fans in the ACM is incomplete, and misleading, as it does not contain the proper language for whole house fan installation requirements.

This section 2.4.10 should mirror the exact requirements shown in the 2016 standards, section 150.1.C.12 or refer to them instead of the current language in the ACM, for referral purposes when whole house fans are required in a performance modeled T24.
