

DOCKETED

Docket Number:	15-BSTD-04
Project Title:	Residential and Nonresidential Software and related ACM Reference Manuals
TN #:	206322
Document Title:	Letter From CALBO on its Position on Sun-Setting the PV Option
Description:	Support of solar PV credit for entire 2016 code cycle
Filer:	Todd Ferris
Organization:	CALBO
Submitter Role:	Public
Submission Date:	10/9/2015 2:49:07 PM
Docketed Date:	10/9/2015

From: Greg Mahoney on Behalf of CALBO
California Building Officials
1022 G Street
Sacramento, CA 95814

Hi Todd,

I would like to provide CALBO's position on sun-setting the PV option (vs. High performance attics and walls) for compliance in the 2016 CEC.

First of all, it is CALBO's position the any planned revision in mid-triennial cycle is a bad idea for everyone concerned and would only create confusion and frustration on the part of the applicants and jurisdictions.

Second, CALBO members believe that the more compliance options available to the stakeholders and users of the code the better. Providing more options allows for greater design flexibility while still realizing energy savings.

The planned sun-setting of a viable compliance option, mid-code cycle, does not appear to benefit the stakeholders at large.
