Subject: Docket Number 15-OIR-04 - Elimination of AB 1103 Energy Use Disclosure

Importance: High

WOW! Energy Disclosure does WORK!!! From San Francisco's Energy Desk:

"Dear Energy Service Providers,

[San Francisco's Existing Commercial Buildings Performance Report 2010 - 2014](#) was released on October 5th, 2015. We want to thank you all for the large role you've played - we certainly could not have done it without you!

Energy consumption by commercial properties in San Francisco has declined significantly since 2011 after the implementation of San Francisco's Existing Commercial Buildings Energy Performance Ordinance, according to a new report released on October 5th from the Urban Land Institute Greenprint Center for Building Performance (Greenprint). The report is a collaboration between Greenprint and the San Francisco Department of the Environment. Please see the full [press release](#)** for more information."

**The [San Francisco Existing Commercial Buildings Performance Report](#) shows a 7.9-percent reduction in energy use across a cohort of 176 properties consistently tracked since 2010. A review of a broader group of 817 buildings found that the implementation of energy reduction measures could save tens of millions of dollars in costs over the lifetime of the projects, adding significantly to the properties' value.

So, why on earth would California eliminate AB 1103 when energy disclosure actually works?! Why eliminate it when Title 24 has the goal of 50% of existing building to be ZNE! That is never going to happen if energy disclosure laws are eliminated.

Governor Brown, the elimination of AB 1103 is completely counter to your efforts at Green Jobs, Lower Energy Consumption and Lower Emissions, and A Better Environment!!! What on earth is going on at the CEC? They are acting in counter to your efforts! Overturn the elimination of this law! It is ridiculous!

Sincerely,
Marika
