Sacramento, CA 95814-5512

Subject: **ALAMITOS ENERGY CENTER (13-AFC-01) STATUS REPORT 12**

AES filed the Supplemental Application for Certification (SAFC) for the Alamos Energy Center (AEC) with the Energy Commission on October 26, 2015, replacing the AFC filed with the Energy Commission on December 27, 2013.

Based on staff's initial review of the SAFC, no new issues have been identified.

Staff provided a proposed schedule in Status Report #11 and is working to file data requests in the technical areas of Air Quality, Cultural Resources, Noise and Vibration, Project Description, Traffic and Transportation, Transmission System Engineering and Waste Management by the November 30, 2015 date on that proposed schedule. Although the SAFC replaces the original AFC, staff is working with the applicant to minimize the scope of data requests by identifying information provided during the original discovery phase that is still accurate and applicable. Staff is working on updating or rewriting PSA sections prepared as part of the original AFC process and developing new data requests to address the revised project. Staff new to the project will visit the proposed site on December 3, 2015.
