December 10, 2015

Dear Librarian:

DOCUMENT HANDLING FOR THE AES ALAMITOS ENERGY CENTER (13-AFC-01)

On October 26, 2015, AES Southland Development, LLC (AES-SD) submitted a Supplemental Application for Certification (SAFC) (13-AFC-01) to the California Energy Commission to address significant revisions to the design for modernizing the existing Alamitos Generating Station (AGS). The SAFC replaces the original Application for Certification (AFC) filed on December 27, 2013. The Alamitos Energy Center (AEC), as currently proposed, would be located on approximately 21 acres of the 71-acre brownfield AGS site. The proposed project site is bounded to the north by State Route 22; to the east by the San Gabriel River; to the south by 2nd Street; and to the west by N. Studebaker Rd., in the city of Long Beach, Los Angeles County, California. Existing Alamitos Generating Station Units 1–6 are currently in operation with a net generating capacity of 1,950 megawatts (MW). Although AES still intends to demolish all six operating units, AES is no longer including the demolition as part of the proposed AEC project, but now plans to accomplish the demolition under a separate CEQA proceeding through a Memorandum of Understanding with the city of Long Beach. Demolition of retired Unit 7 and construction activities at the project site are anticipated to last 56 months, from first quarter 2017 until third quarter 2021.

The AEC is under the Energy Commission's siting authority. The Commission's power plant certification process examines engineering, public health and safety, and environmental aspects of power plant proposals and provides analyses pursuant to the California Environmental Quality Act (CEQA). When issuing a license, the Energy Commission is the lead state agency under CEQA and through its certified regulatory program produces several environmental and decision documents rather than an environmental impact report.

The Energy Commission's siting process is open to the public and incorporates the input of the public as well as local, state, and federal agencies. To facilitate public participation in our review process, the Energy Commission has sent copies of the AFC to libraries in the project area, Eureka, San Francisco, Sacramento, Fresno, Los Angeles, and San Diego.

Please replace the December 2013 AFC with the enclosed SAFC and make it available for those who may wish to be informed about the project. We request that you not allow the SAFC or any of its contents to be removed from the library. To increase accessibility of the document, we ask, if possible, that you cross reference it as a general reference work under the title and author categories, as well as under such subjects as "Energy Commission," "electricity," "energy/generation," "power plant siting," or any other relevant subject.

Thank you for your cooperation. If you have any questions, please contact Christopher Meyer, Energy Commission Project Manager, at (916) 654-4640 or by e-mail at christopher.meyer@energy.ca.gov or Cenne Jackson, Project Assistant, at (916) 651-9010 or by e-mail at cenne.jackson@energy.ca.gov.

Date: 12/10/15

Sincerely,

Chris Davis, Siting Office Manager
