Docket Number: 15-MISC-05

President of the CPUC in speaking of the vision needed

Why is does the President of the CPUC in speaking of the vision needed, speak as if you haven't been considering what the customer and system needs and how things fit together to meet critical system needs and green house gas reductions?

Is this why it appears that carbon per kWh is on the increase?

Please view video contained in the attached PDF.

See http://ugemrp.com/caiso/dashboard/co2/index_week_45.svg for a view of carbon reductions.

Additional submitted attachment is included below.

Alex Weiss, California Energy Storage Alliance

Agency discussion of potential policy next steps (1:45 PM)
