Subject: SPA Campbell PTA Questions

Hi John:

My staff was reading through the analysis that was prepared for the recycled water petition to amend for SCA Campbell Soup and had a few questions with regards to the hazardous materials management section:

1. Please provide the size (dimensions and capacity) of the existing secondary containment structure for the sodium hypochlorite tank.
2. Please provide a plan view of the existing secondary containment showing the location of the new proposed sodium hypochlorite tank along with what will be the largest tank in the secondary containment, if it's not the proposed new 3,000 gallon sodium hypochlorite tank.
3. Please confirm that the holding capacity of the secondary containment will be adequate to meet LORS for all tanks to be placed in it.

Please let me know if you need clarifications, etc.

Thanks,
Mary
