## **Notice of Public Comment Period Docket No. 15-BSTD-03**

### **Application for Locally Adopted Energy Standards by the City of Santa Monica in Accordance with Section 10-106 of the California Code of Regulations, Title 24, Part 1**

California Energy Commission staff will review and evaluate the proposed application as it relates to the 2013 California Code of Regulations, Title 24, Part 1, Section 10-106. The review of the application will determine if the application is complete and includes all the supporting information necessary to meet the requirements of Section 10-106. During this review process, staff will also be accepting public comments. The public comment period is 60 calendar days, starting from the posting of this Notice and Santa Monica's application package.

#### **Purpose**

At its regular meeting on October 27, 2015, the Santa Monica City Council conducted a public hearing and approved a local energy ordinance in accordance with Section 10-106 of the California Code of Regulations, Title 24, Part 1. At this meeting, the City Council determined that mandating the ordinance was cost-effective.

The City of Santa Monica submitted its application with the following:

- A copy of the signed ordinance which, among its provisions, includes requirements that constitute a local energy ordinance beyond the baseline energy code.
- A staff report containing statements and analyses that conclude the proposed energy standards within the ordinance are cost-effective and will not require buildings to consume more energy than permitted by the current California Energy Code, and that includes evidence that the ordinance was approved on the first reading at a noticed public meeting; and
- A cost-effectiveness study with supporting analysis showing how the city determined the energy savings and finding that the proposed standards are cost-effective.

## Background

The California Code of Regulations (Title 24, Part 1) Section 10-106, specifies that energy standards for newly constructed buildings, additions, alterations and repairs to existing buildings may be adopted by local government agencies provided that the Energy Commission finds that the standards will require buildings to be designed to consume no more energy than permitted by Title 24, Part 6.

## Public Comments

Written comments should be submitted by 5:00 p.m. on March 19, 2016. If you wish to submit comments on the proposal, please submit them using the e-commenting feature on the Commission's webpage
