Early Enforcement of 2016 Lighting Alteration Rules

Hello

I am the president of a small lighting contracting company who has been very diligent in complying with Title 24 mandated rules and enforcement. We have been very successful at providing a single source design/build/certify lighting installation. In regards to the newly adopted rules for Title 24 2016 part 6, It is my opinion that such provision and allowances given for alterations and modifications should be allowed immediately as is in the best interest of saving energy and achieving California state goals. We have several projects that will be able to proceed with the amended rules due to the reduced cost of installation. I ask the council to consider the purpose of the adopted allowances for alterations and modifications and move to take early adoption of said rules prior to the January 1, 2016 date. Thank you for your consideration.

Brian Morales

President

Pro-Cal Lighting, Inc.
