California Energy Commission
Commission Members
Robert B. Weisenmiller, Ph.D.
Chairman

March 1st, 2016

Hello Chairman Weisenmiller, California Energy Commission Members & Staff,

Is Diablo's danger increasing? This is really frightening news!

February 29, 2016 - Headline: Can We Pause The Bernie-Hillary Wars For A Moment? Major Carbon Monoxide Explosion West Coast

"Earth emits a burst of carbon monoxide (CO) a few days before an earthquake, according to geophysicist Ramesh Singh. He and co-workers from France and the United States report that this gas could be used as one of the precursor signals for an earthquake early warning system.

The scientists used data from an American satellite and analyzed changes in carbon monoxide at different altitudes. "The carbon monoxide shows enhancement in concentration a few days prior to the earthquake," Singh said."
