Porter Ranch Gas Leak and Scheduled Restart

I'm a homeowner in the Porter Ranch area right in front of the Southern California Gas company. I understand that Semptra "Southern California Gas" is attempting to restart injecting natural gas back into the storage facilities. I urge you to stop this immediately. We cannot have another leak or anything even close to it. Close to 5000 homes and over 15,000 people got displaced due to the last gas leak.

These aging wells and storage facilities are unfit to store natural gas at this point, this site is too close to residential homes and should not be used.

I urge you to do everything in your power to start relocating and reallocating the natural gas that is stored here.

Thanks,
