Mission Rock Energy Center

Greetings, California Energy Commission: I would like to express my concern over an alternate site proposed for a 50 MW energy plant, known as the Mission Rock Energy Center, offered for consideration by Calpine Corporation on a property near Santa Paula where I live. Most of the time, Santa Paula is directly downwind of this site by just a few miles. This is a narrow valley, and many of us are concerned that the increase in pollutants from this gas-fired plant, will adversely affect Santa Paulans, especially the young, the elderly, and those with sensitive conditions like asthma and emphysema. I hope you don't put this here; we're mostly poor people in Santa Paula, with maybe more health problems than other places, and this will not be good for us. Why is it that we have the jail nobody wants, the dump nobody wants...and now a power plant nobody wants? Isn't this wrong? We're not the best or only place this thing can go. I'm calling foul! I heard the people in Moorpark already said NO. That's what I say!

Thank you for thinking about this.
