Location

If the power plant is built, it will be 6.3 miles from the city of Saticoly, 2 miles from the city of Santa Paula, and 0.7 miles from the frequently used Highway 126. The power plant will destroy the beautiful view that travelers get from the many citrus orchards from both sides of the highway. It will be easily seen from the two cities of Saticoly and Santa Paula. The Mission Rock project affects me by ruining the lovely charm of the Heritage Valley and the view of the highway as i frequently uses as i travel to Ventura and back. This location is horrible because it would not only ruining the charm and view from one community but four, Fillmore, Santa Paula, Saticoly, and Ventura, as well as a very used highway. I ask that you do not install this power plant here.
