Residents 400 feet from proposed Mission Rock site

I commend those who have generated the previous posts. Along with the in depth information posted I would add which I feel is important is that there are two resident homes approximately 400 feet southeast of the proposed Mission Rock site. 1205 Mission Rock Rd is the address of my 84 year old father in law who has lived there for over 50 years and is sharing the home with other family members. This I feel should be a serious consideration under Sensitive Receptors. Thanking you in advance Morris Taylor
