As a small business owner

As a small business owner if I spilled a chemical in my place of business I would get sued so fast and they would shut me down! But SoCalGas can spill all over us residents and get away with it! Hold them accountable and shut them down that was not a spill that was a complete BlowOut!!! Impacting many many lives! Including mine and my family who have suffered over the 42 years and can see that well from our front door. We are still suffering from our health. We are turning to solar but if they won't shut down they should buy out all the homeowner at TOP Dollar!
