Please close down Aliso Canyon Storage facility

We are residents of Porter Ranch. We've been suffering health problems including headaches, rashes, eye infections, dizziness, etc. for some time now, and our dog recently passed away from kidney and liver failure. We don't see the same birds, lizards and rabbits we once did when we first moved in. Our grass, trees and plants have suffered as well. The vet at the animal hospital said that he's seen many animals from Porter Ranch with the same ailments, and they don't make it either. We don't feel safe because of the age of the facility, the failing wells (67 and counting), the fall out from the blowout and the subsequent burglaries that followed. Please, shut it all down and allow us to heal as a community.
