**No**

The Porter Ranch Gas Storage facility has clearly demonstrated the recklessness of this method of natural gas storage. During the past leak much methane gas was released that almost completely cancelled out all the air pollution efforts of the past few years. No we do not want it reopened. It needs to be shut down. If for some reason it reopens evacuation plans and a compensation fund needs to be established. Also a buyout of existing homeowners should be made available for al those living within 20 miles of the project. A fund needs to be established to monitor the health of all residents.
