STATE OF CALIFORNIA

Energy Resources Conservation and Development Commission

In the Matter of:) Docket No. 82-AFC-2C) (P800-83-011)
Kern River Cogeneration Co Kern River Cogeneration Pr	Order Approving Amendments ompany's) to Air Quality Condition

Kern River Cogeneration Company (KRCC) has submitted a request to amend the California Energy Commission (CEC) Decision for the Kern River Cogeneration Project (Omar Hill facility). The change involves Air Quality Condition of Certification No. 2.

Kern County Air Pollution Control District's (KCAPCD) Determination of Compliance (DOC) Operational Condition "e" currently states that twenty steam generators shall be shut down during an Omar Hill cogeneration facility oil-firing episode. KRCC is requesting a modification to the condition language so that only a specific number of steam generators shall be shut down dependent upon the number of turbines at the Omar Hill cogeneration facility that are fired on oil (i.e., fuel oil test).

Standard operating procedures require KRCC to perform a fuel oil test on a gas turbine after conducting a scheduled combustion inspection or when the turbine is brought back on line following an outage due to combustion section problems. KRCC is requesting the change because it has become an increased burden on Texaco operations to provide field wide oil-fired offsets for a procedure which typically requires twenty minutes with one turbine oil-fired. KRCC believes that approval of the requested change will provide a better match of field oil-fired offsets during periods of fuel oil testing.

STAFF RECOMMENDATION

Staff concludes that the proposed amendment is noncontroversial in nature, and recommends Commission approval for the following reasons:

- Staff analyzed the request and concludes there would be no significant additional environmental impacts associated with approving the request;
- Staff requested comments from all interested parties, and did not receive opposing comments from any interested party or agency;

- 3. Staff is agreement with the Kern County Air Pollution Control District's analysis of the request;
- 4. The proposed change retains the intent of the Decision adopted by the Commission;
- 5. The proposed change is based on information which was not reasonably or readily available to the parties prior to Commission certification; and
- 6. The licensee, KRCC, is in agreement with the proposed change.

CONCLUSION AND ORDER

The California Energy Commission hereby adopts Staff's recommendation and findings as its own, and Orders that the Kern River Cogeneration Project Decision, 82-AFC-2, Air Quality Condition of Certification No. 2 (specifically, the Kern County Air Pollution Control District's Determination of Compliance) be amended so Operational Condition 'e' be modified as follows:

(Note: Bold type indicates change.)

- e. Nine steam generators, six unscrubbed (APCD P/O #4003388-393) and three scrubbed (APCD P/O #4003279, 280 & 281), shall be shut down in the event that four turbines at the Omar Hill cogeneration facility are fired on oil.
- e.1. Six unscrubbed steam generators (from above list) shall be shut down in the event that three turbines at the Omar Hill cogeneration facility are fired on oil.
- e.2. Four unscrubbed steam generators (from above list) shall be shut down in the event that two turbines at the Omar Hill cogeneration facility are fired on oil.
- e.3. Two unscrubbed steam generators (from above list) shall be shut down in the event that one turbine at the Omar Hill cogeneration facility is fired on oil.

June 1, 1989

Kern River 82-AFC-2C

Mr. C. O. Myers Kern River Cogeneration Company P.O. Box 80478 Bakersfield, CA 93388

RE: KRCC AMENDMENT TO THE CEC DECISION, 82-AFC-2:
AIR QUALITY CONDITION OF CERTIFICATION NO. 2 - MODIFICATION
OF THE KERN COUNTY AIR POLLUTION CONTROL DISTRICT'S
DETERMINATION OF COMPLIANCE

Dear Mr. Myers:

Attached you will find a copy of the California Energy Commission's "Order Approving Amendment to Air Quality Condition of Certification Number 2 pertaining to KCAPCD's Determination of Compliance." This order approves KRCC's request to modify DOC Operational Condition 'e'.

If you have any questions, please call me at (916) 323-8958.

Sincerely,

SANDRA L. FLEISCHMANN
