RESOLUTION NO. 008 242

WHEREAS, the Los Angeles Department of Water and Power (LADWP) must use natural gas in its electric generation facilities to serve native electric load and wholesale electric transactions; and

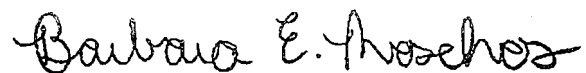

WHEREAS, the LADWP has been purchasing its own natural gas and transporting the gas to its generation facilities using the Southern California Gas Company gas distribution system; and

WHEREAS, in 2006 the LADWP executed a Master Services Contract, LADWP No. 47498-6 providing for firm gas transportation service, which runs for an initial term of two years, after which time it reverts to an interruptible service contract for a term of month to month; and

WHEREAS, the LADWP will need to extend the Master Services Contract for firm service as well as acquire the use of additional related services available under the Master Services Contract to support future additional low capacity factor generation resources such as renewables.

NOW THEREFORE, BE IT RESOLVED that the Board of Water and Power Commissioners requests authorization by ordinance to amend and extend the Master Services Contract, LADWP No. 47498-6, with the Southern California Gas Company, for firm gas transportation, gas storage, and related services, without further approval of the Los Angeles City Council pursuant to Section 373 of the Los Angeles City Charter, provided that the Board makes findings that no alternative to intrastate gas transmission service is available.

I HEREBY CERTIFY that the foregoing is a full, true and correct copy of a Resolution adopted by the Board of Water and Power Commissioners of the City of Los Angeles at its meeting held on MAY 20 2008.
