## **Aliso Canyon**

Aliso Canyon needs to be completely shut down! It is unsafe to my family, the residents, the animals, the plantlife, water supply, atmosphere and everything in LA and the world. My family was very sick during the blow out and even now, my children get sick, rashes, bloody noses and more. When the blowout occurred on Oct 23, 2015, it was the most impactful event for me and my family. My kids had bloody noses, rashes, headaches, ear aches, nausea and more. I was not only sick but was not able to run my business and almost took it to the ground and can not even rescue it. My life was impacted, my safety and rights were taken away, my kids suffered and my family suffered and yet, I feel that not only so cal gas failed, but so did our government and regulators. If I did Poisoning residents who pay taxes and rely on the government for their safety were left to die in Porter Ranch. Even almost a year later, we still smell gas, we still get sick and the gas company admitted to 2 leaks a day minimum now, never the less, they want to reopen and pressurize the mountain. What do you think is going to happen. I sadly do as it is logic. Just one hint, San Bruno episode 2. Mercaptan is an unknown and untested chemical. Till now, we know people get effected by it and the future effects are unknown but based on some small studies and facts we see across the world, it is deadly and can cause at the least cancers. Our children are the future. What did they do to have their lives shortened and their future taken away? What did I do wrong by moving to Porter Ranch when the developer never even told me that there is fracking, oil, gas and one of the largest gas storage facility less than half a mile away. In the past I was told that it is the gas companies main office. Never was told that they inject natural gas into the ground to sell on the commodity market. Never was told that there was a change of leaks and chance of getting sick. Never was advised that my house and my family can be blown up. The gas company was negligent and had no safety plans and the government / regulators have no care for the people but their pockets? I want Aliso shut down. I gave them a change the past few months to get the facility safer but they have failed. The complete infrastructure is falling apart and I do not see the gas company trying to fix and replace all pipes and valves that are leaking or missing. I want my safety back. I want my life back. I want my health back!!! Now we need to shut the facility down as it is not needed to supply los angeles.
